

About Our Energy Audit App

Our Energy Audit App is designed to analyze and optimize energy consumption in Hostel L and K at Moi University. By leveraging real-time data collection and analysis, the app helps identify energy inefficiencies, track usage patterns, and suggest cost-effective solutions for energy conservation.

This project aims to promote sustainability and reduce electricity costs while enhancing awareness of efficient energy management within student accommodations. Through advanced monitoring and reporting features, our app empowers users to make informed decisions on energy use, contributing to a greener campus environment.

MANAGEMENT

- 1. Stanley Maingi – Group Leader/ lead App design**
- 2. Christine Wathoni – Administrator**
- 3. George Omondi – Lead Report Generation and Presentation**
- 4. Kerren Bosibori – Lead Data Collection**
- 5. Francis Oduor**
- 6. Ogola Denis**
- 7. Joshua Omondi**
- 8. Franklyne Kibet**
- 9. Vanessa Keziah**
- 10. Brian Mayora**
